Health Education instills in students the knowledge and skills needed to examine alternatives and make responsible health-related decisions. Drawing on knowledge from the biological, environmental, psychological, social, physical, and medical sciences, health education helps students learn to prevent and manage health problems.

Areas of study in Health Education include:

- Human Growth and Development
- Nutrition
- Family Life
- Alcohol, Tobacco, and Other Drug Substances
- Safety, First Aid, and Survival
- Community Health
- Environmental Health
- Diseases and Disorders
- Consumer Health
- Emotional Health
- Healthful Life Styles
